My Profile

Web development is more than just a job for me, it's a true passion. With over 5 years of experience building high-quality websites and applications, I bring a wealth of technical expertise and creative problem-solving skills to every project. Originally from Barcelona, I bring a unique perspective to my work, combining the best of both worlds in terms of design and functionality and life culture.

My expertise spans a range of technologies, including HTML, CSS, JavaScript, and various CMS platforms, especially WordPress. I have a proven track record of delivering projects on time and on budget, while consistently exceeding client expectations. Whether working on a simple brochure website or a complex e-commerce platform, I bring the same level of dedication and attention to detail to every project.

In my current role as a web developer, I collaborate closely with clients, designers, and other team members to bring their vision to life. I am always looking for new challenges and opportunities to grow professionally and am excited about the next chapter in my career. If you're looking for a talented and dedicated web developer, I would love the opportunity to connect and discuss how I can bring value to your projects.
